### WORK EXPERIENCE

● **18/09/2023 – 03/11/2023** Islamabad, Pakistan

● **INTERNSHIP** applivity (pvt) Ltd

I worked as an intern at Applivity (pvt) Ltd. During my internship, I learned how to make websites using HTML, CSS, and JavaScript. I worked on the design and layout of web pages to make them look good and work well. This experience helped me understand how websites are built and how to solve small problems in coding. I also learned how to work with a team and follow deadlines.

### PROJECTS

● **14/03/2024 – 03/02/2025**

● **Quiz Master App**

Quiz Master is a mobile app that helps users learn in a fun and easy way by solving quizzes. This app allows users to choose subjects like Math, Science, English, AI, and General Knowledge. It has two quiz modes – Easy Mode with no timer and Hard Mode with a timer for more challenge. Users get instant results after finishing a quiz, which helps them learn faster.

In this project, I worked on both the front-end and back-end using Flutter and Firebase. I designed the user interface to be simple and friendly. I added features like subject selection, quiz generation, score display, and a replay option. I also worked on user login and data storage using Firebase. This project helped me improve my skills in mobile app development, problem-solving, and user experience design.
